## **TRAINING TITLE**

ENVIRONMENTAL IMPACT ASSESSMENT

## **VENUE**

Dubai, UAE

## **DURATION**

5 Days

## **DATES**

12 - 16 July 2020

## **PRICE**

US\$4,000 per attendee including training material/handouts, morning/afternoon coffee breaks and Lunch buffet daily.

## **TRAINING INTRODUCTION**

Environmental Impact Assessment is a very critical issue nowadays round the world. The waste regardless of its type and classification is a crucial issue, how to collect, segregate, handle and treat are very important issue. Chemical material waste segregation and disposal is a major term. Surveying the area with hazardous is of a big concern taking into account the environmental aspects and the associated parameters in conjunction with management of waste, disposal and also treatment.

## **TRAINING OBJECTIVES**

Objective of this course is to provide the participant a detailed understanding on the environmental requirements for an industrial plant and their effective implementation. This course has designed to make the participant understand, learn and thereby implement Environmental management system and other requirements effectively to the fullest with a holistic view. This course consists of presentations, briefings, case studies, teamwork & short tests.

## **TRAINING AUDIENCE**

This course is aimed for HSE managers, engineers, officers, team leaders, supervisors & those who are interested to participate and improve the safety performance of the organization.

## **TRAINING OUTLINE**

- Incident / Accident, near miss Investigation & Reporting with case studies and corrective and preventive actions
- Incident and incident report
- EMS System
- EMS audit and Review
- Review with appropriate quiz and End of course
- Case Studies

## **TRAINING CERTIFICATE**

**MAESTRO CONSULTANTS** Certificate of Completion for delegates who attend and complete the training course

## **METHODOLOGY**

Our courses are highly interactive, typically taking a case study approach that we have found to be an effective method of fostering discussions and transferring knowledge. Participants will learn by active participation during the program through the use of individual exercises, questionnaires, team exercises, training videos and discussions of “real life” issues in their organizations. The material has been designed to enable delegates to apply all of the material with immediate effect back in the workplace.
